## Education

---

08/2021 – present	<b>Software Engineering</b>
Adama, Ethiopia	<i>Adama Science and Technology university</i>

## Profile

---

A dedicated Full Stack Developer specializing in building scalable and efficient web applications. Skilled in designing seamless, responsive solutions that integrate front-end and back-end technologies. Proven ability to drive technical excellence and deliver business value through maintainable, high-performance software. Committed to leveraging expertise to contribute to dynamic software development teams.

## Projects

---

### FurniShop [🔗](#)

Developed a full-stack MERN e-commerce platform for buying and selling furniture, featuring user authentication, product listings, and secure payment integration.

### Intern-hub [🔗](#)

Built a centralized platform using Node.js, Express.js, MongoDB, and Next.js, connecting students and companies for internship opportunities with features like Internship postings and application management.

### ExpenseTracker [🔗](#)

Created a full-stack MERN application for tracking personal expenses, offering intuitive budget management, and expense categorization.

### Crypto\_news [🔗](#)

Designed a front-end Next.js application delivering real-time cryptocurrency news, with a responsive UI and seamless API integration for up-to-date content.
